The Strategic Brief

> "Your audience isn't afraid of AI. They're afraid of being the one person in the room who can't ship it."

Each day targets one ICP at their exact emotional breaking point.

🔥 Carlos — TOFU
"Make me feel safe"

🛠️ Ron — MOFU
"Make me feel capable"

🧩 Maya — BOFU
"Make me feel supported"

Why This Webinar Wins

The Competition

❌ Liam Ottley

No GHL. $5K-7K hidden behind a sales call.

❌ Jordan Platten

UK-centric. Application funnel. Friction.

❌ Billy Gene

Paid ads only. Over-40 targeting. No organic.

✅ Nuno's Edge GHL + AI + Organic YouTube + Transparent $67 pricing.

The anti-guru move — no hidden costs, no application friction, no geographic lock-in.

The only creator combining GHL specialization + AI automation + organic-first YouTube strategy 3× GHL SaaS

Award Winner – the only educator competitors can't replicate $67 transparent pricing vs $5K-7K hidden behind a sales call

Non-coder teaching non-coders – "vibe coding," not programming 25 years

Fortune 100 IT credibility – Bank of America, Capital One Co-teaching with Kaila Love – ex-Amazon

AI Solutions Architect $0.67/day to own a permanent AI employee vs $350-500/day for a developer

DAY 1 · CARLOS · TOFU

The Architect's Blueprint

OBJECTIVE: SAFE

> "I've spent 25 years in IT at Bank of America and Capital One. The coder is officially optional."

Teaching Blocks

01

Vibe Coding vs Writing Code

3:00–3:20

02

The 7-Phase Launch Sequence

3:20–3:40

03

MCP — The USB Ports for AI

3:40–3:55

🎬 Live Demo

CLAUDE.md Memory Setup – encoding brand standards live.

Objection handled: "I'm not technical" → Claude Code acts as a junior developer. Follow the SOP. The AI handles the terminal.

CTA Email: *"Are you being left behind by the AI gurus?"*

📌 *By end of Day 1: explain the 7-Phase Sequence, set up your CLAUDE.md playbook, and understand why you don't need to write a single line of code.*

DAY 2 · RON · MOFU

The 15-Minute Blitz

OBJECTIVE: CAPABLE

> "Yesterday was the Why. Today is the How. You're shipping before 4 PM."

Teaching Blocks

01

Directing the Autonomous Loop

3:00–3:20

02

Token-Efficient Architecture

$0.67/day vs $350/day · 3:20–3:40

03

Localhost to Live URL

Vercel + Supabase · 3:40–3:55

🎬 Live Demo

ROI Calculator – idea to live URL in under 15 minutes, link shared in chat.

Objection handled: "Token costs will bankrupt me" → Sub-agent architecture keeps costs under $1/day.

CTA Email: *"Today we build your first AI Employee live."*

📌 *By end of Day 2: complete app built from idea to live URL using the 7-Phase sequence, with AI token costs under $1/day.*

DAY 3 · MAYA · BOFU

The Infrastructure

OBJECTIVE: URGENT

> "A single app is a hobby. An AI Nervous System is a business."

Teaching Blocks

01

The AI Operating System

$400 websites → $2,500+ deals · 3:00–3:20

02

Agent Orchestration

Reviewer + Frontend Dev + Tester for $0.67/day · 3:20–3:40

03

App Security

Kunal's ex-Amazon framework · 3:40–3:55

🎬 Live Demo

Done Day Sequence – voice note → GHL pipeline update → Supabase record → personalised email, all autonomous.

Objection handled: "I don't have time to implement" → Shipped-or-Solved guarantee: show up + don't ship = Nuno works with you 1:1 until done.

CTA Email: *"FINAL CALL: Your AI workforce is ready to be hired."*

📌 *By end of Day 3: orchestrate parallel AI agents inside GHL, apply enterprise-safe security, and package this as a $2,500+ client deal.*

Why $67 Feels Like Stealing

The Hormozi Value Equation: **Value = (Dream Outcome × Likelihood) ÷ (Time Delay × Effort)**

⬆️ Dream Outcome

Permanent AI Employee in GHL – **$0.67/day** vs $500/day developer

⬆️ Perceived Likelihood

25 years Fortune 100 + 3× GHL Award + ex-Amazon security co-teacher

⬇️ Time Delay

Working app by end of Day 2. Pre-Work Guide = zero setup lag.

⬇️ Effort & Sacrifice

Zero terminal. Zero Python. 10-lesson SOP library – Mac + Windows.
